Problem Statement

Student Innovation-Asolution /idea that can boost the current situation of the tourism industries including hotels, travel and others.

Tourism services are fragmented. Tourists need multiple platforms for accommodation, transportation, attractions, restaurants and activities. Small local businesses also struggle to reach tourists.

IDEA TITLE

Key Problems

SCATTERED INFORMATION

Travel information is scattered across multiple websites and apps, making harder to find accurate and reliable details.

LACK OF PERSONALIZATION

Most of the platforms gives those suggestions that don't match with preference ,interests or budget of traveler

TIME-CONSUMING PLANING

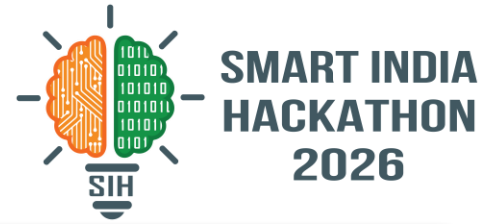

It takes hours even days to plan the entire trip, finding, comparing and finalize the best option.

LANGUAGE BARRIERS

Many people face language issues, local guidance while travelling especially in unfamiliar places

DIFFICULT IN CHOOSING BEST OPTION

Finding the right hotels, attractions, restaurants, and transport options that are safe, reliable, and value for money is very challenging

The solution- manzilbharat

USER PREFERENCE

Destination, budget, Interests, safety.

AI ANALYSIS

Smart matching & recommendations

PERSONALISED ITINERARY

Day-wise plan with best places

HOTEL

Best, suitable, safe hotels

BUDGET ESTIMATE

Transparent cost breakdown

TRANSPORT

FOOD

ATTRACTIONS

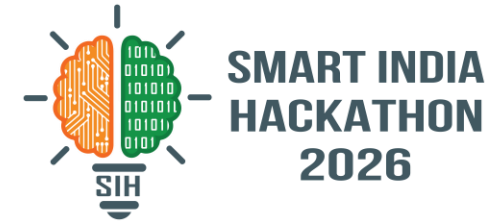

etc.

BETTER TRAVEL EXPERIENCE

Hassle-free, memorable and affordable trips

TECHNICAL APPROACH

FRONTEND

- HTML5
- CSS3
- JAVASCRIPT
- GOOGLE FONTS

BACKEND

- Python + Flask
- Node.js

DBMS

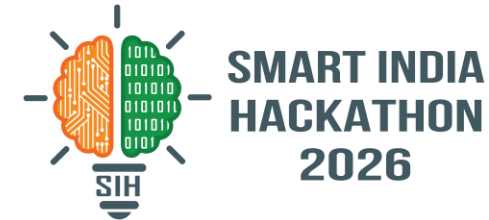

- Postgresql(postgres)
ORDBMS

API

- Local Transport API → metro/ traintram /ferry
- Maps API → routes/local stores/ dhabas /medical shops
- Cab API → rides
- Bike API → availability
- Flight API → flights
- Bus/General Transit Feed Specification → transit
- Cruise API → cruises
- Hotel API → hotels
- Weather API → forecast
- Translation → languages

FEASIBILITY AND VIABILITY

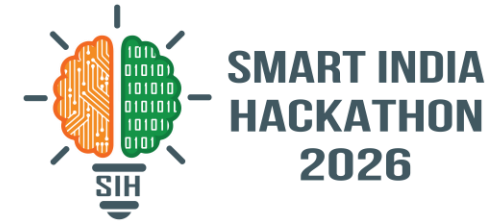

DIMENSION	RATING	NOTE
Technical Feasibility	Medium	Node.js + Express + Postgres is a solid combination.
Scope Feasibility	Low	Competing with MakeMyTrip is unrealistic For beginner developers
Timeline Feasibility	Low	Full product as scoped = 8-10 months with 5+ engineers
Cost Feasibility	Medium	Estimated monthly costs at scale: API subscriptions , cloud hosting , payment gateway fees , domain/SSL .
Market Feasibility	High	India's travel & tourism market is projected at ₹10.5 lakh crore+ by 2027. "Made in India, for India" positioning is strong.

RISK CATEGORY	IMPACT	RISK	SOLUTIONS
Technical	Critical	Plaintext admin passwords in DB	Implement bcrypt hashing immediately
Business	Critical	Competing with MakeMyTrip, Ola, IRCTC, RedBus simultaneously	Focus on one vertical first
Operational	High	Payment gateway compliance (PCI-DSS)	Use Stripe/ Razorpay SDKs, never store card data
Timeline	High	8-10 month roadmap is unrealistic for full scope	Prioritize MVP

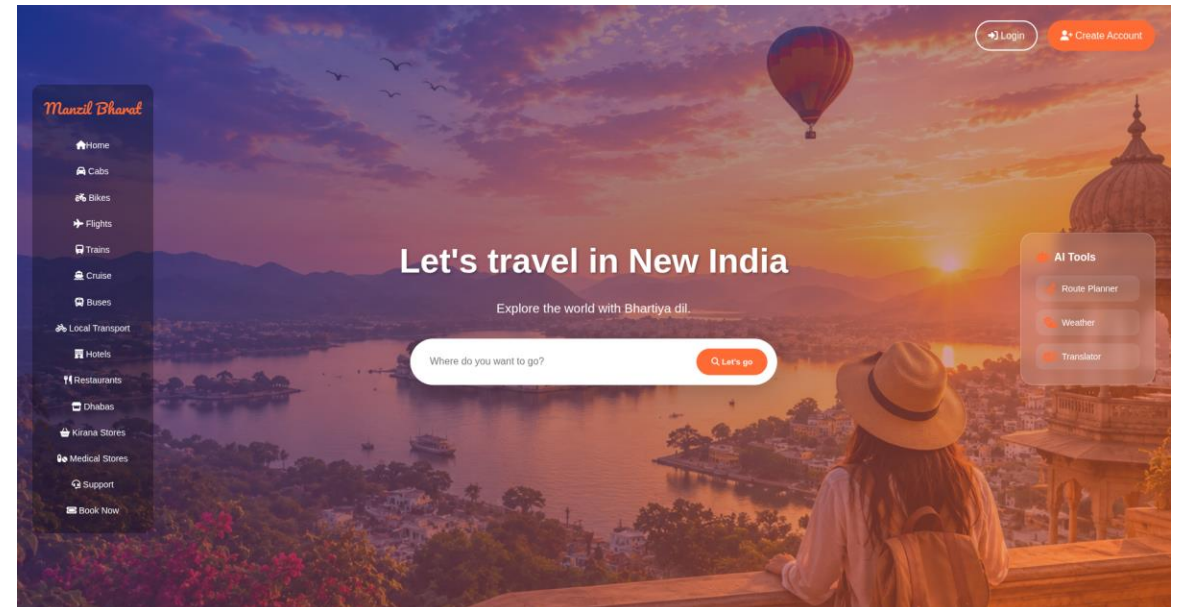

IMPACT AND BENEFITS

IMPACT

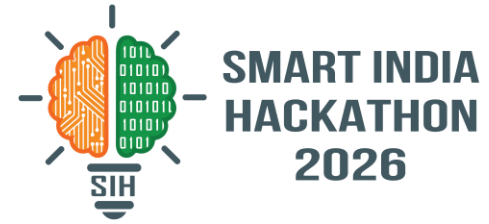

- Better tourist experience
- Increased hotel occupancy
- More business for local vendors
- Promotion of lesser-known destinations
- Reduced overcrowding
- Increased tourism revenue
- More sustainable tourism
- More safety
- Better experience

Manzilbharat is a unified AI-powered tourism ecosystem connecting tourists, hotels, transportation providers, local businesses and tourism authorities.
